FerroForte

Sterile Iron Dextran for Injection 200 mg/mL

DIN 00857041

Veterinary Use Only

ACTIVE INGREDIENT:

FerroForte[®] is a clear, free flowing dark brown solution containing a macromolecular dextran and iron complex containing 200 mg/mL elemental iron with 0.5% w/v phenol as a preservative.

INDICATIONS:

For the prevention and treatment of iron deficiency anemia in newborn piglets.

DOSAGE & ADMINISTRATION:

Inject 1 mL (200 mg iron) intramuscularly at one (1) to three (3) days of age. Disinfect the site of injection.

STORAGE:

Store at room temperature (15°-30°C).
